

WEATHER FORECASTING RESEARCH PART II

By Alphee Lavoie 3/18/2015

Testing Techniques From C.C. Zain Weather Predictive Book

C. C. Zain did his weather predicting using the charts of moon's phases -- the new moon, first quarter, full moon, and third-quarter.

According to ZAIN

The wet signs are -- Capricorn, Scorpio, Cancer, Pisces, and Taurus, in that order.

The dry signs are -- Aries and Aquarius are the driest, and then Gemini, Sagittarius, and Leo in that order. The sign Scorpio and Capricorn brings blizzards, floods in heavy rain. The sign Taurus gives what the farmer calls growing rains. A steady rain for a day or two just enough to soak into the ground.

This research was done using 80 years of weather data for Hartford, Connecticut.
