

# Uranus and Earthquakes

Franco Minatel

The Astrological Investigators

**Abstract-** Japan is in an earthquake zone and, astrologically, Uranus is the ruler of earthquakes<sup>1</sup>. This study will examine the placement of Uranus in the charts of major earthquakes of a magnitude of 6 or higher on the Richter Scale.

## **Index Terms-**

*Chi-Square distribution* – this value determines if a measurement is statistically significant. It indicates whether the measurement is greater or less than the expected value.

*Uranus Cycle* – Uranus takes approximately 84 years to cycle through the 12 signs of the zodiac.

## **1. INTRODUCTION**

This study is a subsection of a more extensive study in which we are trying to predict earthquakes of greater than a 6 Magnitude. The study originated as a global study without much success. We decided if we focused on a localised area, we would get better results. The area chosen was Japan as the country is localised on a fault line.

Astrologically, Uranus rules earthquakes. Therefore this study will try to determine if Uranus' placement in signs will have any bearing on earthquakes and therefore allowing us to predict if there will be more seismic activity during the various periods.

## 2. DATA

- The data used for this study was taken from <https://earthquake.usgs.gov/>
- Data used was from 1900 to 2017.
- Earthquakes in Japan
- Earthquakes 6.0 magnitude to 10 on the Richter Scale\

Uranus has an 84-year cycle through the zodiac spending roughly 7 years per sign. The period for earthquakes used in this study was taken from 1934 to 2017 when Uranus was at 25° Aries to 25° Aries. There were 822 major earthquakes in this period.

This equates to 68.5 earthquakes per sign, although, the actual time spent per sign is not uniform. Table 1 illustrates the distribution. Most of the signs are roughly around the 7-year mark.

Table 1. Earthquake per Sign

Uranus in Sign	Years in sign	Expected Earthquakes/sign
Aries/Pisces	7.5	73.4
Average	7	68.5
Libra/ Scorpio	6.5	63.6

#### 4. CONCLUSION

- Uranus in Aries, Cancer, Virgo, and Pisces have the most earthquakes while Uranus in Taurus, Gemini, Scorpio, and Sagittarius have the least.
- When Uranus is in water signs, we can expect more earthquakes than when in air signs.
- If Uranus is in cardinal signs, it will yield more earthquakes than in fixed signs.
